

# Don't let the SWINE FLU get you!

## A Simple Solution That Pays for Itself

The average annual cost of unscheduled absences is now estimated at \$755 per employee. Of all unscheduled absences, 32% are due to personal illness.[1] Every empty chair is more than an absent employee. It's missed deadlines, rescheduled meetings, lost opportunities, and other disruptions.

Now there's a simple way to reduce the spread of germs that lead to unplanned absences. It's effective, easy-to-implement, and affordable.

Instant Hand Sanitizer helps reduce the spread of germs that may cause illness. In fact, studies have found that making Hand Sanitizer readily available can have a dramatic impact on absenteeism due to illness.[2] When you add up the costs of each unscheduled absence, it's easy to see why Instant Hand Sanitizer is such a smart investment.

## Put Instant Hand Sanitizer everywhere germs might be.

Where can Instant Hand Sanitizer help in your workplace? Look for places where people and germs come together. Our Instant Hand Sanitizer is available in a variety of dispensing options so there's at least one that's right for every location.

Using this chart as a guide, see where you can use Instant Hand Sanitizer.
